

Full Stack Engineer at Wingify Software Pvt Ltd

Experience: 2 - 6 Years

Pune ,

Salary: 1000000-1500000

SKILLS: PHP , MongoDB , Node.js , Python ,

Description

- We are looking for an entrepreneurial software engineer to join the team that powers VegFru.com (<http://vegfru.com/>). Vegfru.com is one of a kind online trading portal for fruits and vegetables and their associated services. It's a place where buyers and suppliers meet to conduct business, it helps in better discovery and hosts a consolidated ever-growing repository of Agri Businesses. It is poised to be the Alibaba of Fruits and Vegetables. This is a once in a lifetime opportunity to define, build and scale an ecosystem that is revolutionizing the agricultural trading landscape in India. You will take business concepts and ideas and transform them to live products and workflows, used by millions of buyers and sellers worldwide. From optimizing customer checkout flows to building scalable payment solutions and managing millions of products – we are looking for engineers who will work on challenging problems of scale. Your work will cater to both consumers and sellers. Desired Skills & Experience:
- Top-notch software engineering talent
- Self-directed, independent and has experience owning complete features/products
- Proficiency in full stack web-application development (LAMP stack)
- Proficiency with relational databases (MySQL, etc.)
- Ability to communicate across technical and non-technical groups
- A desire to build an engaging consumer experience
- B.Tech, BE, or Ph.D. in Computer Science or equivalent
- 3+ year experience in engineering

CTQ

What all products have you worked on?

Do you have proficiency in full stack web-application development? Can you name the same?

Do you consumer experience? In terms of app development? Please explain

About Company

Wingify, a Delhi based fast-growing software company, makes Visual Website Optimizer (VWO), a market leading tool that helps marketing professionals optimize sales and conversions on their website using a variety of techniques such as A/B testing, behavioral targeting, heatmaps, usability testing, etc. VWO is used by thousands customers across 80+ countries, and the customer base includes big brands like Microsoft, AMD, GE, EA Sports and Rackspace.
